

AKWARIUM
GDYŃSKIE

Gdynia, 07.05.2013r.

Letter of reference

At the beginning of 2013 The Aquarium in Gdynia entrusted renovation of glass in six exhibition tanks to the Clear View Company. It involved six cm thick panes of tempered glass. Work was carried out in the period from March to May and included removing scratches and thorough polishing of the glass surface. Due to the renovation, the achievement was a new glass effect without the need of replacing the glass, which significantly increased the exposure values.

High quality of provided services and the professionalism of Clear View Company employees allow me to confidently recommend it to anyone considering renovations of glass surfaces.
